

In vivo experiments in mice

 Dihua Yu

Updated date: Jun 23, 2021

 An abbreviated version of this protocol was published in Science Translational Medicine in May 2020

Blocking immunosuppressive neutrophils deters pY696-EZH2-driven brain metastases

DOI: [10.1126/scitranslmed.aaz5387](https://doi.org/10.1126/scitranslmed.aaz5387)

Detailed protocol
